Concentration

Results-driven and self-starting front end developer with a proven track record building and maintaining complex web applications for businesses, cities, and counties. My work has been recognized by the U.S. Center for Digital Government Awards.

EXPERIENCE

Front End Developer, Nicholas Calderone, llc | 2019-Present

- Building accessible, user-friendly interfaces and interactive features using React and Vue
- Developing and maintaining modular, reusable CSS with styling tools such as Styled Components and SASS
- Enhancing user experience by integrating RESTful APIs for dynamic content updates, resulting in a more polished and responsive web application
- Working in cross-functional teams using collaborative development workflows like Agile and Scrum, and version control systems such as Git
- Diagnosing and resolving issues using developer tools to ensure performance and reliability
- Building and managing websites that handle over 350,000 monthly pageviews
- Collaborating closely with stakeholders and cross-functional teams to translate complex project requirements into efficient and scalable software
- Providing detailed Google Analytics reports to understand user behavior and inform strategic planning decisions
